

Fancy pants newfangled
Project Management :)

First, remember what you know.

“Lean”

Think “trim the fat.”

Compatible with older and newer models

Emphasizes “reduction of waste”

“Six Sigma”

A super mathy implementation of “Lean”

(comes from statistics / standard deviations)

MEASURE and MATH EVERYTHING.

DMAIC or DMADV

“Six Sigma”

A super mathy implementation of “Lean”

(comes from statistics / standard deviations)

MEASURE and MATH EVERYTHING.

“Waterfall”

A relatively classic way of doing software; each phase falls into the next (and mostly doesn't go back)

Requirements->

– Design ->

• Implementation ->

– Verification ->

• Maintenance ->

Enter..

AGILE

“Agile”

The new hotness.

As the name suggests, more flexibility, even in planning.

Check the “Agile Manifesto”

“Scrum”

An implementation of “Agile”

Iterative, incremental – with set and frequent meetings, of a SET DURATION.

Call those “sprints” (2 to 4 weeks?)

Meets DAILY.

“Kanban”

Another implementation of “Agile”

Focuses on –

- Backlog to
- Work in Progress
- Completion.
